Designation:-**Assistant Professor ,Department of Botany ,  
Brahmanand P.G. College, Kanpur.**

### Introduction

Pigeonpea (*Cajanus cajan* (L.) millsp.) is the second most important pulse-crop after chickpea in India. It is mostly referred as Arhar or tur in vernacular and red gram in English besides India. It is also grown in South East Asia, Africa and America. It is a woody, short lived perennial shrub of subfamily papilionaceae of leguminosae family.

#### A Good Introduction :-

*Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.*

### Materials

The present investigation has been carried out in Botany Dept of Brahmaand P.G. College, Kanpur U.P. Lab. The details of materials used, experimental procedures followed and techniques adopted are described as below:

#### A Good Materials :-

*Materials may be accounted for in a different passage or else they may be distinguished alongside your systems. In biosciences we habitually work with arrangements - allude to them by name and portray totally, including convergances of all reagents, and pH of watery arrangements, dissolvable if non-fluid.*

### Result

Must add result in your article.

#### A Good Result :-

*Results are as per aims and objective and useful to further research .*

### Discussion

The pigeonpea crop under study holds an important place among the pulses due to its major use in vegetarian diet to meet the protein requirements of the people. So for its acreage production and nutritive values are concerned, much emphasis is being laid on increasing its production by use of good quality seeds.

#### A Good Discussion :-

*Clarify the majority of your perceptions however much as could be expected, concentrating on systems. Choose if the trial outline satisfactorily tended to the speculation, and whether it was legitimately controlled.*

### REVIEWER COMMENTS

- The writing audit was careful, the approach was carefully exhaustive and fused the utilization of sufficient quantities of tests in dust size examination and blast tests.
- I discover no shortcoming at all with the routines, information examination, or conclusions.
- The work, as with all work advancing from this specific gathering, is generally sound.
