ABSTRACT

The purpose of the study was to investigate the behavior of players of Football, Boxing and Wrestling. 300 subjects were selected randomly from the players playing contact games of State/National Level Competitions. An equal number of subjects i.e. 100 each were taken from the above mentioned games. To measure aggression, Aggression Questionnaire constructed by BUSS and PERRY (1992) was administered and to measure violence, The Maudsley Violence Questionnaire constructed by JULIAN S. WALKER (2005) was administered.

Introduction

Societies are becoming highly concerned with the performance of athletes at the national and the international arenas and celebrate athletic success and bestow attention, trophies of gold and great riches upon victors.

A Good Introduction :-

Depict the significance (importance) of the study - why was this value doing in any case? Give a wide connection. Extremely briefly depict the exploratory configuration and how it achieved the expressed destinations.

Materials

The study has been designed to investigate the behaviour of different types of players playing Football, Boxing and Wrestling games with regard to the selected variables of Aggression and Violence.

A Good Materials :-

Materials may be accounted for in a different passage or else they may be distinguished alongside your systems. In biosciences we habitually work with arrangements - allude to them by name and portray totally, including convergances of all reagents, and pH of watery arrangements, dissolvable if non-fluid.

Result

Must add result in your article.

A Good Result :-

Results are as per aims and objective and useful to further research.

Conclusion

the study may be concluded as the football players have found to be more aggressive and accepted the violence than their counter parts of boxing and wrestling players as far as body contact games are concern.

A Good Conclusion :-

Clarify the majority of your perceptions however much as could be expected, concentrating on systems. Choose if the trial outline satisfactorily tended to the speculation, and whether it was legitimately controlled.

REVIEWER COMMENTS

- This was a superb give an account of extremely intensive examination.
- The writing audit was careful, the approach was carefully exhaustive and fused the utilization of sufficient quantities of tests in dust size examination and blast tests.
- I discover no shortcoming at all with the routines, information examination, or conclusions.
